Carry Bag

SET UP INSTRUCTIONS

Step 1
Ensure the ground is free from sharp objects, unfasten the tent and spread it out on the ground. Then peg down the floor.
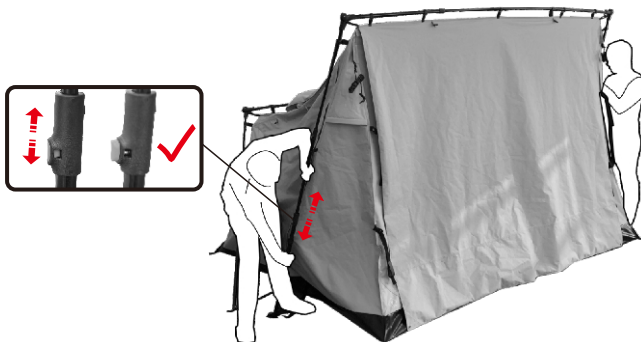

Step 2
Slide the roof pole out from both sides until you hear a "click" sound.

Step 3
Stretch all four leg poles until you hear a "click" sound. The poles are now fully extended.

Step 4
Fasten all floor adjustable webbings and peg down.

Step 5
Fix the roof fly by using guy ropes and peg out away from the tent.
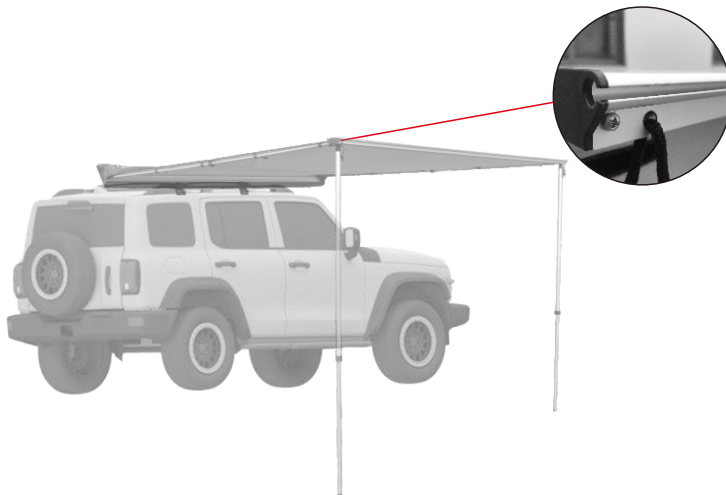

Step 6
To assemble the awning use the steel poles and guy ropes provided. Peg down the guy ropes to secure the poles.

ADDITIONAL INSTRUCTIONS
# FOR FITTING TO AN XTM AWNING

Step 1

The awning with channel slot (as picture) can be attached to awning hub. There is a keder connector above the front door.

Step 2

First take the keder connector off awning hub, and insert the keder into channel slot.

Step 3

Then zip the zipper of keder connector and awning hub, attach all the adjustable webbing straps to awning poles.
